

CARAVITA®

Exclusive parasols and sun sails

2021 Innovations

Big, bigger, Grande

With its proud span width of up to 10 metres, the new large parasol Grande offers plenty of space for guests.

This robust shade dispenser is manufactured precisely to customer requirements. Different sizes, 200 frame colours and over 120 acrylic fabric designs are available.

More on page 36

Smart operation

Greater convenience with the clever WMS radio system from WAREMA: control one or more parasols conveniently with a hand-held transmitter or, thanks to clever sensors, automatically to fit the weather conditions.

More on page 31

Now even faster

The elegant cantilever parasol Amalfi can be opened in just a few seconds thanks to its optional motor drive.

More on page 46

Clean air

The unique ProNature acrylic fabric is treated with a special, invisible finish which ensures clean air. Just 4 m² fabric surface eliminates the annual nitrogen oxide emissions of 20,000 km of passenger car mileage through photocatalysis.

More on page 95

Using solar energy

The all-round talent Big Ben is now also available with a solar panel. This allows the parasol to be opened and closed wirelessly – giving flexibility and independence.

More on page 31

Comfort accessories

New seat cushions are making the tried-and-tested Multicube parasol stand even more comfortable!

The cushions are waterproof and dirt-resistant with 100% polyester covers, and available in three colours.

More on page 64

CARAVITA Designer

With the CARAVITA Designer, our parasols can be experienced in your own home as smart app applications using Augmented Reality.

The AR App for visualisation

The CARAVITA Designer is your configurator for the virtual planning of your parasol. Through the Augmented Reality app, BIG BEN and Co can be easily configured, and your personal location of use can be visualised.

The free app is quick and easy to install, and lets you experience live how your parasol will look on patios, balconies, or in the garden. You can set the size, select a suitable parasol fabric and configure frame colour, motorisation and other extras. The AR app is available for iOS and for Android.

You can find more information about the app here: www.caravita.de/designer

CARAVITA
AR Designer

It's this easy

1. Download the "CARAVITA AR Designer" app for free from the App Store (iOS) or the Play Store (Android). Visualisation is best suited for a tablet, but is also possible using a smartphone.

2. Open the app, select a parasol model and scan the ground.

3. Configuration of size, colour, fabric and many extras.

4. Save the configuration as a PDF and obtain a non-binding price estimate from a local CARAVITA specialist partner.

CARAVITA - The summer manufacturer

Spending time with friends and family, in the garden, eating and celebrating are often the best moments. As early as spring, when the first warm rays of sunshine lure us outside, we want to enjoy additional comfort. Sophisticated trend products in the field of sun and weather protection are indispensable for leisure in the countryside. They make it possible to create new favorite places and make outdoor living a year-round pleasure.

For these moments, the high-grade parasols and sun sails from CARAVITA ensure comfortable and cooling shading, as well as necessary protection against UV radiation. Thanks to comfortable extras such as LED and radiant heaters, you can create a cosy atmosphere and unforgettable evenings.

We are proud to have our solutions accompany you through life's best moments. Our products are based on many years of experience, precision craftsmanship and passion. We manufacture your CARAVITA parasol according to your ideas and requirements.

In the hotel industry, food service industry, nursery schools and swimming pools, or in your private garden. CARAVITA stands for robust, customised sun shading solutions that are appreciated by customers worldwide.

Experience the exclusive CARAVITA atmosphere and enjoy the 5-year warranty!

5 YEAR
WARRANTY*

*5 years in accordance with our warranty conditions which can be found at www.caravita.eu/warranty

CARAVITA - A parasol unlike any other

At CARAVITA you don't get just any parasol, but a high-grade and reliable shading system tailored to your personal requirements.

Handmade for you

The choice is yours: size, pole colour, fabric design. Each parasol is then individually manufactured according to the requirements of our customers. With over 25 years of experience, a lot of passion, and high-grade materials, your unique shading system is created - a parasol unlike like any other and a real eye-catcher.

Just my colour

We use extremely resilient fabrics made of acrylic fibres. These protect against harmful UV radiation and convince with their charisma. With over 120 designs, you are sure to find the right fabric for you. And brand new: ProNature acrylic – the innovative shading fabric that cleans the air!

The material makes all the difference

CARAVITA parasols are made of high-grade aluminium. Reinforced struts, a solid hub and a pole with up to 85 mm diameter and 5 mm wall thickness are not only more than most parasols on the market, but also guarantee extreme wind stability and durability. We also guarantee this with our 5-year warranty*.

On-site contact

Would you like a personal consultation, would you like to see CARAVITA parasols live or are you interested in an installation? No problem: we are sure to have a competent specialist partner in your area who will take care of your needs.

*5 years in accordance with our warranty conditions which can be found at www.caravita.eu/warranty

Overview

Central pole parasol selection

Samara
The parasol with convenient crank mechanism.

12

Big Ben
All-rounders with spans of up to 7 metres and optional LED light, radiant heaters, motor and more. Also available as a Freestyle version with a custom-made canopy.

24

Supremo
Easier to open than any other parasol thanks to a sophisticated sliding mechanism!

18

Grande
The large parasol made to measure – especially for the high demands of the food service industry.

36

Cantilever parasol selection

Amalfi
Elegant cantilever parasol with crank mechanism. Also available as a DUO, with two canopies, or as a QUADRO with four canopies.

SAMARA

Functional parasol with crank mechanism

See the SAMARA parasol in action
www.caravita.eu/samara

SAMARA

2.5 x 2.5 m, cover 4034r acrylic, silver anodised frame, with wind roof

With its smooth crank mechanism, this shade provider unfolds easily to its true size to welcome guests underneath. Samara dispenses warm sun rays during the day and ensures comfortable temperatures under the parasol in the evening. Even in the largest size, this visually slight parasol is amazingly easy to use.

The benefits for you

- Closes over tables and patio furniture thanks to sophisticated telescopic system
- Struts made of high-grade aluminium provide wind stability
- Smooth and reliable crank mechanism

Technical details

Operation smooth crank

Cover Premium awning fabric in more than 120 colours. 100% acrylic, light-fast and weather-resistant. For information, see pages 94-95. Also available with fireproof fabric or PVC fabric (see p. 95).

Frame white RAL 9016, anthracite grey RAL 7016 or anodised silver, other RAL colours for a surcharge

You can find more information on Samara here: www.caravita.eu/samara

SAMARA

High-grade hub

High stability: The Samara parasol is equipped with an especially strong and solid aluminium hub. Powder coating is available in desired RAL colour.

Smooth crank

Extremely easy to use: Samara can be opened and closed with a detachable stainless steel crank. The mechanism inside the pole ensures that the parasol can be closed easily with minimal physical effort.

Sophisticated telescopic system

The advantage: the telescopic system extends the pole when closing! Tables and patio furniture can simply stay where they are.

Stable struts

The parasol struts, made of 2 mm thick aluminium tube, are reinforced with special profiles in sections under particular strain.

SUPREMO

Parasol with quick sliding mechanism

See the SUPREMO parasol in action
www.caravita.eu/supremo

SUPREMO

Supremo, 3.5 x 3.5 m, cover 5800, silver anodised frame, with wind roof

It's so easy – with its sophisticated sliding mechanism, the Supremo opens and closes much more easily and quickly than other parasols, even for large spans. This means Supremo is a welcome addition not only to private gardens and restaurants, but is also suitable for nursery schools and public institutions.

The benefits for you

- Easy-Lift-Balance ensures easy opening in just a few seconds
- Closes over tables and patio furniture thanks to sophisticated telescopic system
- High wind stability due to double strut direction

SUPREMO

Easy-Lift-Balance system

Supremo has a particularly innovative sliding mechanism: With the tap of a finger on the locking switch, the parasol automatically unfolds halfway using its own weight. All that's left to do is lightly push the handle upward and lock it. This system allows for quick and easy handling, even with large parasols.

Struts with double support

The double strut hub provides double support for the main struts, to which the fabric is attached. An interior aluminium profile provides additional strut support for large parasols. This makes the parasol especially robust and wind-stable.

Supremo, 3.5 x 3.5 m, cover 7730 sky blue

Stainless steel handle with locking switch

Quality in all the parts – the stainless steel handle of the Supremo is practical as well as especially stable! When opening and closing the parasol, its locking switch snaps into place automatically.

Sophisticated telescopic system

The advantage: when closing, the telescopic mechanism extends the pole! Tables and patio furniture can simply stay where they are.

BIG BEN

Durable design

Only the best materials and extra strong aluminium profiles are used in the robust design of Big Ben. The solid pole has a diameter of 84 mm and a wall thickness of 5 mm, making it stronger than most others in its class.

Practical alignment guide

This guide greatly simplifies the erection of large parasols. Simply screw adjusting screws into ground sleeve or mobile base. Position the parasol. Thread the alignment guide into the screw and push the parasol up. Then simply screw in place and it's all done.

Parasol sizes

200 x 300	300 x 600	400 x 650

300 x 550	400 x 600	

You can find detailed dimensions for Big Ben here: www.caravita.eu/bigben

Wind-stable up to 100 km/h!

Its solid design makes Big Ben extra robust! To prove this, the professional parasol was tested by structural engineers in a wind tunnel, in which the 3 x 3 m version can withstand even strong winds of up to 100 km/h!

Telescopic system

The advantage: the telescopic system extends the pole when closing! Tables and patio furniture can stay where they are.

BIG BEN optional extras

Radiant heater

Enjoy your favourite outdoor spaces even on cool days with the integrated radiant heaters for Big Ben. Perfectly suited for long evenings - in the food service industry, but also in a private garden. The wiring runs directly in the frame, invisible and well-protected. The detachable radiant heaters are simply plugged into the connections at the strut ends.

Lights and heating can be switched on and off individually using the central switch at the top of the pole. Optionally, the infrared radiant heater with Ultra Low Glare technology can also be comfortably operated via app, using Bluetooth.

Hint: order your parasol with pre-equipped wiring. Retrofitting is no longer possible. This way you can remain flexible. We will be happy to advise you on all possibilities regarding weather protection.

Elegance - Integrated strut light

With the integrated Elegance LED strut light, you can make any patio shine! Designed to be elegant and unobtrusive, the modern LED strips provide pleasant light. The lights are easily switched on and off via the central switch on the pole or via remote control. The latter also allows you to dim the lights. Also available with coloured LED light strips.

The light strips can be attached to the underside of the struts just as on the top side for indirect lighting.

Big Ben, 4 x 4 m, cover ProNature Brasserie acrylic fabric, frame RAL 7016 anthracite grey, with wind roof radiant heater and LED lighting

Big Ben with WMS motor

The motorised Big Ben offers top-class convenience! With the press of a button on the remote control, several parasols can easily be opened or closed at the same time – and in only two minutes! An unbeatable advantage for restaurant owners – it's never been so easy to use large parasols.

The clever WMS motor can also be easily networked by radio with other sun shading products. So you have everything under control with just one hand-held transmitter.

Big Ben with solar

As an alternative to the WMS motor, the Big Ben is also available with a self-sufficient solar-powered drive. The solar panel uses solar energy and charges the storage battery integrated in the motor. When fully charged, it has enough power to open and close the canopy at least five times. Ideal if no mains connection or line routing is available.

Big Ben 5 x 5 m, cover 4003, pole DB 703, with solar motor drive, LED lighting and parasol base Multicube (60 cm)

Wind roof

The wind roof differs from the wind hood in that it has an additional frame. This lends the parasol an interesting look and makes it even more resistant to wind.

Misting (spray mist system)

A spray mist system ensures pleasant temperatures under the parasol. The water pipes are unobtrusively integrated into the pole and frame.

5 YEAR
WARRANTY*

A large white trapezoidal parasol is the central focus, set in a hotel courtyard. The courtyard features outdoor seating with brown wicker chairs and tables. In the background, a multi-story hotel building with a prominent wooden balcony and white facade is visible under a blue sky with scattered clouds. The foreground is a lush green lawn.

BIG BEN FREESTYLE

Customised high-end parasol

GRANDE

Durable design

Only the best materials and particularly strong aluminium profiles are used in the robust construction of the Grande. The solid pole has a diameter of 120 mm and a wall thickness of 5 mm, making it stronger than most others in its class.

Robust anchoring

The pole is fixed to a 450 kg steel plate with several screws. The plate is placed on a concrete foundation. The Grande is therefore safe and stable in all weather conditions.

Grande, 9 m round, ProNature Marfil acrylic fabric, frame RAL 7016 anthracite grey, with wind roof

Sophisticated telescopic system

The advantage: the telescopic system extends the pole when closing! Tables and patio furniture can simply stay where they are.

Power struts

The parasol struts made of strong 60 x 30 mm aluminium with additional U-reinforcements provide wind stability even at high spans.

AMALFI

Motor drive

With its electric motor drive, Amalfi now opens and closes even faster and more conveniently. The push button is conveniently integrated directly on the motor housing on the pole. (Sensors or other control components cannot be expanded.)

Optional: stainless steel rotary base

Sophisticated mechanism: The rotary base made of stainless steel, rotatable by 360°, is screwed directly onto the ground sleeve or the parasol base. The rotating function is conveniently unlocked by pressing on the pedal. When the pedal is released, the mechanism engages and holds the parasol in position.

Amalfi 3.5 x 3.5 m, cover 7390 acrylic fabric, frame RAL 7016 anthracite grey

Smooth crank winch

Amalfi opens and closes very easily with the smooth crank winch. Self-locking holds the parasol in any position.

Space-saving wall installation

Save space by mounting the Amalfi to walls and railings. The High-Power pole with 60 mm and 4 mm wall thickness is produced for you exactly according to your requirements, such as the wall installation height, the desired crank height etc. After closing the parasol, the Amalfi can be turned to the side to save space.

AMALFI DUO 1 & 2

Double the space in the shade

Amalfi DUO 1 carries two canopies at once on a central High-Power pole with 70 mm and 4 mm wall thickness. It shades even large surfaces elegantly, creating two separate areas with its central pole. The two canopies can be opened independently of each other as required.

Amalfi DUO 2 combines the charm of a classic cantilever parasol with the robustness of a large parasol. The powerful 150 mm pole is laterally offset, so that the shaded area can be used flexibly e.g. for long tables, individual seat groups or a row of sun loungers beside the pool. Both canopies can be opened independently of each other.

Belvedere, 4 m round, cover 7910 turquoise, frame RAL 9016 traffic white, with wind roof

Belvedere is probably the fastest parasol in the world. Thanks to the smart Easy-Flap technology, the canopy opens out in seconds! When closed, it stands upright and takes up minimal space like a central pole parasol – once opened, it transforms into a cantilever parasol with optimal space utilisation and a unique design.

The benefits for you

- Strong aluminium frame ensures longevity
- Easy-Flap system for opening in just a few seconds
- More convenience with stainless steel rotary base rotatable by 360° (optional)
- Unique look and high-grade components

Technical details

- Operation** sophisticated handle mechanism
- Cover** Premium awning fabric in more than 120 colours. 100% acrylic, light-fast and weather-resistant. For information, see pages 94-95. Also available with fireproof fabric (see p. 95).
- Frame** white RAL 9016, anthracite grey RAL 7016 or white aluminium RAL 9006

You can find more information on Belvedere here: www.caravita.eu/belvedere

BELVEDERE

Easy-Flap system

Belvedere has an opening mechanism which is unique among parasols. When closed, it takes up as little room as a central pole parasol. When opened, the parasol canopy moves to the side and the Belvedere becomes a practical cantilever parasol.

Stainless steel rotary base

Sophisticated mechanism: The rotary base made of stainless steel, rotatable by 360°, is screwed directly onto the ground sleeve or the parasol base. The rotating function is conveniently unlocked by pressing on the pedal. When the pedal is released, the mechanism engages and holds the parasol in position.

Belvedere, 4 m round, cover 4017 white, frame RAL 7016 anthracite, with wind roof

High-grade hub

The hubs are the parasol components with the greatest load and are made of solid aluminium. This guarantees high stability and ensures that you can enjoy this shading system for many years. Hubs can be painted with a chosen RAL standard colour to match the frame colour.

Robust pole

Belvedere has an extremely stable 60 x 60 mm mats with 4 mm wall thickness. For square parasols, the pole is delivered in the "left" version as standard. The centre of the parasol is located to the left of the pole. If the pole is to be delivered in the "RIGHT" version, please indicate this when ordering.

Comfia Move

Comfia Move, 4m round, fabric colour ecru, frame colour black matt, with wind bonnet

The Comfia Move central pole parasol is a solid entry model for parasol sizes up to 4 m span. Ideally suited to beer gardens and patios in the food service industry.

The benefits for you

- Closes over tables and patio furniture thanks to sophisticated telescopic system
- Wind pressure can escape through the wind hood
- Handle with patented locking system
- Easy to open with latching function
- Robust thanks to a strong 60 mm pole diameter and struts (18 x 30 x 2 mm) made of high-grade aluminium

Comfia Free

Comfia Free, 3.5 m round, fabric colour ecru, frame colour black matt, with wind hood

The Comfia Free convinces with its high flexibility. The pole can be rotated 360° and the canopy can also be tilted by 140°. Ideal when the sun is low in the sky or for visual privacy.

The benefits for you

- Parasol can be rotated 360° using foot pedal
- Crank for opening and closing
- Inclination of canopy can be freely adjusted using handle on pole and also rotated 140° with rotary mechanism.
- Stable thanks to strong 65 x 98 mm pole and struts (20 x 26 x 2 mm) made of high-grade aluminium
- Wind pressure can escape through the wind hood

MULTICUBE

Additional standing and seating space

The Gabione Multicube is made up of robust steel cages with wood covering and is the ideal replacement for conventional parasol bases with flagstones. The mobile Multicube creates a comfortable atmosphere for additional guests and ensures flexibility when arranging your outdoor area – without having to install ground sleeves.

The benefits for you

- Mobile thanks to lifting device for pallet truck
- Individual size, colour and filling can be selected
- Ideal for advertising
- Easy to retrofit

Colour options for wooden seat covering (softwood, triple sealed)

Cushion colour versions

5 YEAR
WARRANTY*

Multicube

Product information

- Steel cage made of double-bar mesh mats, galvanised with floor
- Suitable for all CARAVITA parasol bases with flagstone dimensions 40 cm x 40 cm
- Fill dimensions: approx. 34 cm x 34 cm
- with softwood covering

Multicube Sets

- Consisting of four individual Multicubes
- Including sheet base Monaco 8 or Dublin 8
- Robust wooden chair with triple varnish in desired colour

Sizes (Height)

40 cm, 60 cm, 80 cm

More information on the Multicube and on using the lifting device can be found here www.caravita.eu/multicube

SUMMERDAY

Mobile sun sail

More information about SUMMERDAY sun sail
www.caravita.eu/summerday

SUMMERDAY

Under the protection of the Summerday sun sail, you can enjoy the nicest days of the year even more. Relax and take a break in your favourite spot. The Summerday sun sail stands out in terms of its uncomplicated structure and high quality processing.

The benefits for you

- Light and mobile
- Extra strong corners
- Tailor-made to customer wishes

Shapes Individual and standard sizes (p. 71)

Max. size 6 m lateral edge
(additional sizes upon enquiry)

Technical details

Fabric

Premium awning fabric in more than 120 colours. 100% acrylic, light-fast and weather-resistant.
For information, see pages 94-95.
Also available in Tentmesh (see p. 94).

You can find more information on Summerday here: www.caravita.eu/summerday

SUMMERDAY

Aluminium pole Ø 50 mm

Available in colours white RAL 9016, anthracite RAL 7016, anodised silver, or at extra cost in other RAL colours as per the colour chart. The poles are reinforced with an internal zinc-coated steel pole for increased load capacity. Combinable with ground sleeve Europa or Pianura.

Stainless steel pole Ø 57 mm

These stainless steel poles can be anchored in the ground in two ways. If the pole is to be combined with Europa KU or LU ground sleeves, please indicate this when ordering. Otherwise the pole can be set directly in concrete.

ALL SEASON

Sun sail for all weather

More information about the ALL SEASON sun sail
www.caravita.eu/allseason

ALL SEASON

The All Season sun sail provides comfortable shading the whole year. Thanks to its robust design it is also ideally suited for large areas. The storm-proof sail is suitable for use not only in your own garden, but is also perfectly suited to nursery schools and playgrounds.

The benefits for you

- Storm-proof design
- Tailor-made to customer wishes
- Permanent installation
- Suitable for particularly large sails

Shapes Individual

Max. size 7 m lateral edge
(additional sizes upon enquiry)

Technical details

Fabric

Water-permeable HDPE net fabric in 16 colours
The robust fabric, permeable for water and air,
filters up to 98% of UV rays.
The colour chart for the Tentmesh HDPE fabric
can be found at www.caravita.de

Robust Processing

Welded fabric webs with 6 mm stainless steel
sail with circular hem.
Double reinforced corners made of solid stain-
less steel with tensioning device. All tension
cables can be adjusted individually.

You can find more information on All Season here: www.caravita.eu/allseason

ALL SEASON

Stainless steel pole Ø 108

pole with 4 mm wall thickness for setting in concrete directly. Anchoring with a ground sleeve is not possible. A flat stainless steel finial top is included in the price. The final height above ground decreases in accordance with the installation depth.

Steel pole Ø 102

pole with 5 mm wall thickness for setting in concrete directly. Anchoring with a ground sleeve is not possible. A flat steel finial top is included in the price. The final height above ground decreases in accordance with the installation depth.

Three-way turnbuckle

A solid three-way turnbuckle made of stainless steel serves as corner fixing for the particularly robust construction (adjustment range: approx. 10 cm). The surrounding edges are traversed by a 6 mm thick stainless steel cable. The fabric made of stable HDPE netting is permeable for water and air but filters up to 98% of UV rays.

Easy planning

It's easier than you think to plan a sun sail. To start, the fixing points of the sail must be determined. Then you can determine the dimensions of the sail with a cord. More detailed tips for planning your sun sail can be found at: www.caravita.de/sonnensegel-plannen-und-realisieren

Sail made up of two diamonds

Triangle sail above paddling pools

Trapezoid sun sail for patio shading

square sun sail above courtyard

Sun shading, wind protection and visual privacy at the pool

Freestanding Butterfly

Vertically tensioned sail for visual privacy

Roof gable made of rectangular sail

Patio and facade shading

Weather protection

With CARAVITA, you can enjoy time outdoors even in rainy weather, on cold days and late at night. CARAVITA offers many options to create your individually customised weather protection solution:

Keep your guests dry

Moderate to high rain protection can be achieved by choosing the right fabric. For private use, acrylic awning fabric is usually sufficient. Restaurant owners often opt for the more dense All Weather or Ferrari Preconstraint 302. Drainage gutters can close the gaps between different parasols. Side panels protect against drafts and lateral rainfall.

Create a warm oasis

Detachable infrared radiant heaters can be easily mounted on your parasol. The Big Ben parasol can be equipped with an integrated heating system to provide a professional solution, whereby the cables run safely and discreetly inside the parasol.

Turn night into day

Big Ben parasol lighting creates a stylish ambiance on your terrace. Professionals opt for the Big Ben parasol with integrated Elegance lighting system including dimmer and remote control.

Rain gutter

Tip: Order this useful weather protection device at the same time so that you can always flexibly retrofit it.

Details of the individual options can be found on the following pages.

Lighting and heating (p. 30 - 31)

Side panels (p. 89)

CARAVITA parasol sheets (p. 92 – 95)

Side panels

Closed side panels
Optional door for all types and versions available.

Side panels with transparent windows
Also available with mosquito net.

Complete your parasol with side panels made of premium awning fabric or other high-grade special materials. Side panels are available in different models: closed, with mosquito net or transparent plastic film window. All models are also available with a door.

Samara*	Supremo*	Big Ben*
✓	✓	✓

* only with support poles

Attaching the side panel

Side panels are attached to the parasol struts with carabiner clips. Hook-and-loop strips connect parasols and side panels seamlessly.

Not possible without strut support

Lux type: aluminium poles in hem

Lux type side panels have a hollow seam for inserting aluminium poles. These provide additional stability for the side panels.

Connected by zipper

The individual side panels can be joined together with a zipper. This transforms the parasol into a pavilion in the blink of an eye.

Advertising printing

Screen printing

A screen printing process is perfect for printing on acrylic fabrics. Your logo or motif can include up to 4 colours (without halftone printing).

Please request a free, non-binding quotation if required.

Parasol Configurator

Are you looking for the right parasol?

The CARAVITA Configurator helps you choose. You choose the type of parasol, the colour and the fabric of the canopy, the appearance of the pole and all the accessories – and with one click your new virtual parasol appears before you. It really is that easy to choose a parasol!

Parasol fabrics

Quality for your long-lasting enjoyment.

Only premium-quality fabrics from leading manufacturers are used for CARAVITA parasols. These fabrics offer outstanding weather resistance alongside optimal sun protection features.

What protection factor is ideal for you?

The UV protection factor (UPF) indicates the sun protection effect of the parasol fabric. The higher the value, the better the protection.

Type	Features	Safe direct sun exposure time in minutes	Safe sun exposure with parasol in minutes		
			 UPF 12	 UPF 30	 UPF 50+
1	Light skin, freckles, blonde or red hair, blue or green eyes	5 – 10	60 – 120	150 – 300	250 – 500
2	Light skin, blonde or red hair, blue or green eyes	10 – 20	120 – 240	300 – 600	500 – 1000
3	Dark hair, blue eyes	20 – 30	240 – 360	600 – 900	1000 – 2000
4	Dark skin, dark or black hair, dark eyes	~ 45	~ 540	~ 1350	~ 2250
5	Dark skin, black hair	~ 60	~ 720	~ 1800	~ 3000
6	Black skin, black hair, dark eyes	~ 90	~ 1080	~ 2700	~ 4500

Parasol and Sun sail fabrics

Acrylic fabric

The tried and tested acrylic awning fabric is manufactured from 100% spinning nozzle dyed brand acrylic fabric. That means that the colour pigments – unlike in classic yarn dyeing – are applied during the fibre production. This ensures reliable protection against damaging UV radiation and permanently guarantees brilliant colours / constant weather and light-fastness. Furthermore, the acrylic fabric is especially tear-resistant and also dirt and water-repellent thanks to its impregnation with a special protective agent. The reliable solution for long-term outdoor use.

- Water-proof from 300 - 370 mm water column, EN 20811
- High colour and weather fastness (7 - 8) of 8
- Water and dirt-repellent
- 100% acrylic fabric 285 – 300 g/m²
- Commercial printing possible on canopy and valance

These colours are also available in **All Weather quality**. All the advantages of acrylic fabric. Water-proof up to 1000 mm water column, EN 20811.

Tentmesh

Tentmesh is a net made of UV-resistant flat and HDPE yarns. Depending on the colour, it reduces UV rays by 91% to 98% and sunrays by 77% to 96%. Because Tentmesh is water-permeable, this fabric is the optimal solution for designing flat tensioned sails. Parasols that are used all year round can also be covered with Tentmesh.

- Parasols with an edge length of up to 4 m can be covered with Tentmesh. Not compatible with Big Ben Freestyle.
- Net made of UV-resistant flat and HDPE yarns
- Reduces UV rays by 91% to 98%
- Reduziert Sonnenstrahlen zwischen 77 % – 96 %
- Optimally suited for light membrane structures
- Surface weight: approx. 340 g/m²

LUMERA acrylic fabric

The innovative Lumera acrylic fabric is woven with the special CBA fibre (Clean Brilliant Acrylic). Along with all the benefits of the acrylic fabric, this provides even more bonuses. The acrylic multifilament fibre has a smoother and denser surface. This means that the colours turn out richer and more radiant and the fabric's luminance is increased for a long time.

- Water-proof up to 460 mm water column, EN 20811
- High colour and weather fastness (7 - 8) of 8
- Water and dirt-repellent
- 100% acrylic fabric 290 g/m²
- Commercial printing possible on canopy and valance

Ferrari Precontraint 302

This PVC-coated sun protection membrane is particularly robust and durable. Absolute water impermeability and high flame resistance are two further features to be appreciated.

- Not compatible with Big Ben Freestyle and Belvedere
- Polyester mesh with PVC coating
- Absolutely waterproof
- Dirt-repellent
- Flame resistant (B1 as per DIN 4102)
- High colour fastness (7 - 8 of 8, DIN EN ISO 105-B02)
- Surface weight: 480 g/m²
- Commercial printing possible on canopy and valance

TempotestStar FR

The TempotestStar fabric collection from PÀRA is a highly flame resistant fabric, which meets the recognised building materials class B1. The 100% spinning nozzle dyed, high-grade polyester is available in many colours and is a specialised solution for applications in which fire safety plays a central role.

- Building materials class B1 (DIN 4102)
- Oil, water and dirt-repellent
- High colour and weather fastness (7 - 8 of 8 DIN EN ISO 105 B04)
- Water-proof up to 300 mm water column, UNI EN 20811
- 100% spinning nozzle dyed polyester 300 g/m²

ProNature acrylic fabric

With ProNature acrylic fabric, CARAVITA offers an innovation that has it all: the fabric treated with a finish provides clean air. Photocatalysis is used to eliminate pollutants such as nitrogen oxides, sulphur oxides and organic substances, thereby neutralising odours. For simply more sustainable quality of life. The specifications of this ingenious fabric are the same as for the conventional, tried-and-tested acrylic fabric.

- Water-proof from 300 - 370 mm water column, EN 20811
- High colour and weather fastness (7 - 8) of 8
- Water and dirt-repellent
- 100% acrylic fabric 285 – 300 g/m²
- Commercial printing possible on canopy and valance

Warranty conditions

1. General information

By purchasing a CARAVITA product, the contracting partner of CARAVITA GmbH is entitled to statutory warranty claims. These claims are not restricted by a warranty.

2. Period of warranty

In addition to statutory claims, CARAVITA GmbH grants a warranty service to the contracting partner for a period of 5 years from the date of invoice.

3. Effectiveness of warranty

The warranty service is valid in all member states of the European Union.

4. Warranty protection

The warranty service includes:

- The functionality of the frame profile
- The functionality of the connecting elements
- The colour-fastness of the parasol covering (aging processes of the fibres by more than one point on the colour-fastness scale after light fastness (DIN EN ISO 105-B02))

The following parasol models of the Selection Series are covered by the warranty:

- BigBen
- Amalfi
- Belvedere
- Grande
- Supremo
- Samara

5. Exclusion of the warranty

Damage or defects due to improper use or failure to comply with the installation instructions or instructions for use are not covered by this warranty.

6. Establishment of contact in the event of a warranty case

When discovered, a warranty claim must be reported to:

**CARAVITA GmbH, Am Augraben 21, 85080 Gaimersheim,
Phone: +49 8458 603890**

7. Service in the event of a warranty case

Defects in the product components covered by the warranty will be assessed within a reasonable period of time after notification of the defect and will be eliminated free of charge if the warranty conditions are met.

The expenditure required for this purpose, specifically transport, travel, labour and materials will be borne by us.

Claims beyond this improvement are not granted by this warranty. Wherever possible, improvement works will be performed at the installation site. Otherwise, they will be performed at our customer service workshop.

Warranty services do not extend or reset the warranty period for this device; replaced parts become the property of CARAVITA.
