Parasols and sun sails

Make every place your *favourite* place

At CARAVITA, you don't get just any parasol – you get a custom-made shading system in robust professional quality. Made in Europe.

- **Quality:** high-grade aluminium, reinforced struts and resistant acrylic fabrics ensure that CARAVITA parasols and sun sails make for durable and wind-stable companions – even under demanding weather conditions.
- **Individuality:** with over 60 parasol sizes, more than 200 frame colours, 150 fabric variants and optional extras such as radiant heaters or LED lighting, everybody is bound to find their perfect shading system – individual and custom-fit.
- **Service & consultation:** our regional specialist retailers are happy to advise you on your project and will take care of the professional installation of your sun shading products. Find your specialised CARAVITA retailer here:
www.caravita.eu/dealer

Sustainability and social responsibility

Sustainability and social responsibility are integral parts of our corporate philosophy. We want to make active contributions to a fair world and a future worth living. That is why we focus on longevity right from the product development stage, using high-grade materials and ensuring that wear parts can be easily replaced. We continuously optimise our processes during production and logistics to ensure that we can use resources even more efficiently and carefully.

BELVEDERE

Cantilever parasol with Easy-Flap system

Belvedere is probably the fastest parasol in the world. Thanks to the smart Easy-Flap technology, the roof opens out in seconds! When closed, it stands upright and takes up minimal space like a central pole parasol – once opened, it transforms into a cantilever parasol with optimal space utilisation and a unique design.

Frame colour

Choose from more than 200 RAL
CLASSIC colours

Pole

Aluminium pole with a diameter
of 60 x 60 mm and a wall thick-
ness 4 mm

Fabric

Premium parasol fabric in more than 150 colours. 100% acrylic fabric, light-fast and weather-resistant

Struts

Aluminium struts
30 x 15 x 2 mm with strut
reinforcement

Your benefits

Max. shading

12 m²

Detailed dimensions for height and weight available at www.caravita.eu/amalfi

AMALFI

Elegant cantilever parasol

The Amalfi canopy sways freely, seemingly weightless. The pole of the parasol stands laterally, thus creating plenty of space for tables and chairs. While the sun may wander during the day, the shade remains exactly where it is needed. With the optional stainless steel rotary base, the Amalfi can be rotated 360° without having to move the base.

Struts

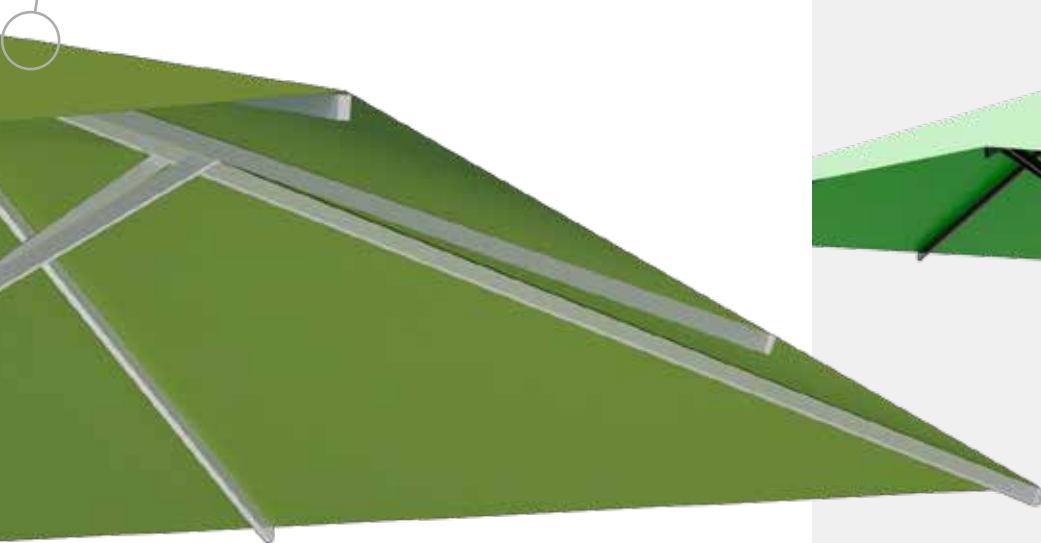

Aluminium struts 30 x 15 x 2 mm with strut reinforcement for maximum wind stability

Pole

High-Power mast – 60 x 100 mm and 4 mm wall thickness (triple welded)

Fabric

Premium parasol fabric in more than 150 colours. 100% acrylic fabric, light-fast and weather-resistant

Frame colour

Choose from more than 200 RAL CLASSIC colours

Your benefits

- Flexibility thanks 360° pivotable mast (optional)
- Optionally available with two or four canopies
- Suitable for wall installation

ALL SEASON

Sun sail for all weather

The All Season sun sail provides comfortable shading during the summer months. Thanks to its robust design it is also ideally suited for large areas. The sail is not only perfect for use in private gardens but also in nurseries and on playgrounds.

Corners

Double reinforced with a 3-way stainless steel clamping device

Pole

Optionally available with Ø102 mm steel pole or Ø108 mm stainless steel pole

Fabric

Water-permeable HDPE Tent-mesh net fabric in 24 colours

Your benefits

- Individual shape and size based on customer requirements
- Permanent installation (in weather conditions without snow)
- Suitable for particularly large sails and individual areas

Accessories and more

A secure stand for your parasol

It is important to choose a parasol stand carefully, to make sure your parasol is positioned securely and sturdily.

Despite the fact that high-grade CARAVITA parasol fabrics and frames are designed to withstand rather strong gusts of wind, any parasol will require sufficient counterweight to keep it in place.

It is up to you, whether you would rather anchor your parasol to the ground or choose a mobile parasol base that will keep your sun shading system more flexible.

Find the right parasol stand to suit your requirements.

Rain and weather protection

With CARAVITA, you can enjoy time outdoors even in rainy weather, on cold days and late at night.

CARAVITA offers many options to create your individually customised weather protection solution:

- Side panels
- Rain gutters
- Infrared radiant heater
- LED lighting

Find out more about our smart upgrades for to stretch out your summer.

Sun shading fabric that cleans the air

Acrylic ProNature is a special parasol fabric from CARAVITA that is optionally available as an impressive upgrade:

The coated fabric is just as robust and offers the same degree of UV protection as standard acrylic fabric, but it also ensures clean air.

The special coating allows for photocatalysis that eliminates pollutants such as nitrogen oxides, sulphur oxides and organic substances. Just 4 m² of fabric will eliminate the NOx emissions of a passenger car with a mileage of 20,000 km/year.

Discover the 20 modern fabric colours of the ProNature collection.

Live parasol visualisation

Which fabric colour matches the wall of my house? Which parasol size will provide shading up to that corner even in the afternoon?

The CARAVITA Designer – the free app for iOS and Android – helps you to plan your parasol.

Augmented Reality technology enables you to easily configure the size and colours of BIG BEN and the other models, and to visualise them on your patio or balcony. Use shadow modelling for your parasol for any time of day or year. The CARAVITA app will help you select the right size and location for your sun shading system.

Download from the App Store now.

How your parasol is made

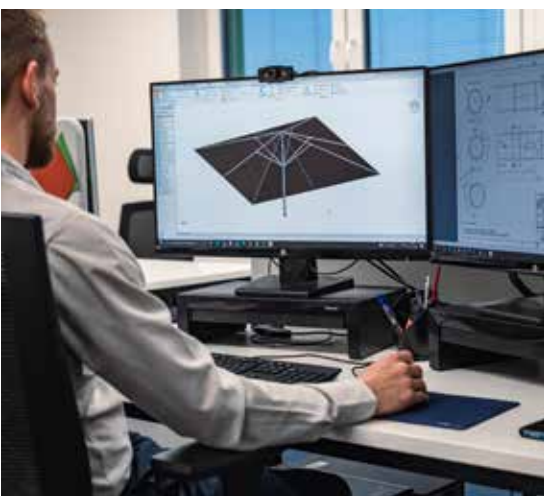

At CARAVITA, you don't get just any parasol – you get a sturdy and individual shading system in professional quality. Made in Europe.

You have the choice of: size, colour, fabric design and convenient features such as radiant heaters, LED lighting, motor drive or intelligent automatic control. Each parasol is custom-made with quality craftsmanship according to your individual requirements. Your unique parasol is the product of over 30 years of experience in the industry, great passion and high-grade materials, allowing you to enjoy the best outdoor moments of the year.

01 Expert advice

Our regional specialist retailers are happy to help you select a model and colour, install the product and determine the structural requirements. All to ensure you purchase a sun shading system tailored to your individual requirements.

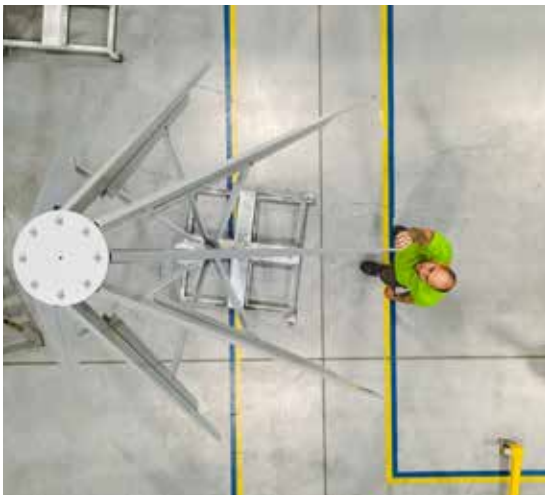

02 Placing an order with CARAVITA

Our technicians review the order placed with your specialist retailer and create a production order in our production system. We then confirm the delivery date with your specialist retailer to give them plenty of time to organise a date for installation at the specified location.

03 Ready, set, go

Now it's time for production to begin. All the necessary materials first undergo a careful quality check by our incoming goods team. This allows us to make sure that our aluminium components, fabrics and electrical components satisfy our strict quality criteria.

04 Precision and passion

A lot of experience and knowledge goes into cutting the aluminium parts and coating them with one of the 200 colours available. While this is happening, the sturdy acrylic fibre fabric is cut with precision down to the millimetre and sewed. Then it's time for assembly, during which the parasol pole is equipped with its inner workings, i.e. a crank gear and optional electrical extras.

05 Final check by an expert

Our experienced quality managers check every nook and cranny of each parasol. The parasol is only delivered to your specialist retailer once it passes the final check with flying colours, meaning the parasol opens and closes easily without any noise and there are no scratches on the frame or fabric.
