Parasols and sun sails

Make every place your *favourite* place

At CARAVITA, you don't get just any parasol – you get a custom-made shading system in robust professional quality. Made in Europe.

- **Quality:** high-grade aluminium, reinforced struts and resistant acrylic fabrics ensure that CARAVITA parasols and sun sails make for durable and wind-stable companions – even under demanding weather conditions.
- **Individuality:** with over 60 parasol sizes, more than 200 frame colours, 150 fabric variants and optional extras such as radiant heaters or LED lighting, everybody is bound to find their perfect shading system – individual and custom-fit.
- **Service & consultation:** our regional specialist retailers are happy to advise you on your project and will take care of the professional installation of your sun shading products. Find your specialised CARAVITA retailer here: www.caravita.eu

Sustainability and social responsibility

Sustainability and social responsibility are integral parts of our corporate philosophy. We want to make active contributions to a fair world and a future worth living. That is why we focus on longevity right from the product development stage, using high-grade materials and ensuring that wear parts can be easily replaced. We continuously optimise our processes during production and logistics to ensure that we can use resources even more efficiently and carefully.

M30 SAMARA

Functional parasol with crank mechanism

With its smooth crank mechanism, this shade provider unfolds easily to its true size to welcome guests underneath. Samara dispenses warm sun rays during the day and ensures comfortable temperatures under the parasol in the evening. Even in the largest size, this visually slight parasol is amazingly easy to use.

Frame colour

white RAL 9016, anthracite grey RAL 7016
or anodised silver included in the price.

Detailed dimensions for height and weight available at www.caravita.eu/belvedere

C30 BELVEDERE

Cantilever parasol with Easy-Flap system

Belvedere is probably the fastest parasol in the world. Thanks to the smart Easy-Flap technology, the canopy opens out in seconds! When closed, it stands upright and takes up minimal space like a central mast parasol – once opened, it transforms into a cantilever parasol with optimal space utilisation and a unique design.

Frame colour

Choose from more than 200 RAL
CLASSIC colours

Pole

Aluminium pole with a diameter
of 60 x 60 mm and a wall thick-
ness 4 mm

Fabric

Premium parasol fabric in more than 150 colours. 100% acrylic fabric, light-fast and weather-resistant

Struts

Aluminium struts
30 x 15 x 2 mm with
reinforcement

Your benefits

- Easy-Flap system for opening in just a few seconds
- More flexibility due to the stainless steel base, rotatable by 360° (optional)
- Unique look and high-grade components

Max. size
Ø 4 m
Max. shading
12 m²

Detailed dimensions for height and weight available at www.caravita.eu/almafi

C40 AMALFI

Elegant cantilever parasol

The Amalfi canopy sways freely and appears weightless. The parasol pole stands laterally, thus creating plenty of space for tables and chairs. When the sun wanders during the day, the shade remains exactly where it is needed. With the optional stainless steel rotary base, the Amalfi can be rotated 360° without having to move the parasol base.

Struts

Aluminium struts 30 x 15 x 2 mm with reinforcement

Pole

High-Power pole – 60 x 100 mm and 4 mm wall thickness (triple welded)

Fabric

Premium parasol fabric in more than 150 colours. 100% acrylic fabric, light-fast and weather-resistant

Frame colour

Choose from more than 200 RAL CLASSIC colours

Your benefits

- Flexibility thanks to the 360° pivotable mast (optional)
- Optionally available with two or four canopies
- Suitable for wall installation (for the model with one roof)

ALL SEASON

Sun sail for all weather

The All Season sun sail provides comfortable shading during the summer months. Thanks to its robust design it is also ideally suited for large areas. The sail is suitable for use not only in your own garden, but is also perfectly suited to nurseries and playgrounds.

Corners

Double-reinforced with a 3-way tensioning device made of stainless steel

Pole

Optionally available with Ø102 mm steel pole or Ø108 mm stainless steel pole

Fabric

Water-permeable Tentmesh HDPE fabric available in 23 colours

Your benefits

- Individual shape and size based on customer requirements
- Permanent installation (in weather conditions without snow)
- Suitable for particularly large sails and individual areas

Accessories and more

A secure base for your parasol

Choosing the right parasol base is essential to ensure your parasol is safe and stable positioned.

Even if the high-quality CARAVITA parasol fabrics and frames can withstand quite high winds, the parasols still need sufficient counterweight to stay firmly in place.

It is up to you, whether you would rather anchor your parasol to the ground or choose a mobile parasol base that will keep your sun shading system more flexible.

Find the right parasol stand to suit your requirements.

Rain and weather protection

With CARAVITA, you can enjoy the outdoors even when it's raining, on cold days and late at night.

CARAVITA offers many options to create your individually customised weather protection solution:

- Side panels
- Rain gutters
- Infrared radiant heater
- LED lighting

Find out more about our smart updates to make your summer last longer.

Sun shading fabric that cleans the air

Acrylic ProNature is a special parasol fabric from CARAVITA that is optionally available as an impressive upgrade:

The coated fabric is just as robust and offers the same degree of UV protection as standard acrylic fabric, but it also ensures clean air.

The special coating allows for photocatalysis that eliminates pollutants such as nitrogen oxides, sulphur oxides and organic substances. Just 4 m² of fabric will eliminate the NOx emissions of a passenger car with a mileage of 20,000 km/year.

Discover the 20 modern fabric colours of the ProNature collection.

Expert advice

Experience the exceptional quality of CARAVITA products up close. Our regional specialist retailers take the time to understand your needs, provide comprehensive advice, and support you reliably from the planning stage through professional installation to service and maintenance

<https://caravita.eu/dealer-search/>

How your parasol is made

At CARAVITA, you don't get just any parasol – you get a robust and individual shading system in a professional quality. Made in Europe.

You have the choice of: size, colour, fabric design and extra electrical accessoires such as radiant heaters, LED lighting, motor driven by intelligent automatic control. Each parasol is custom-made with quality craftsmanship according to your individual requirements. Your unique parasol is the product of over 30 years of experience in the industry, great passion and high-grade materials, allowing you to enjoy the best outdoor moments of the year.

01 Expert advice

Our regional specialized dealers are happy to help you select a model and colour, install the product and determine the structural requirements. All to ensure you purchase a sun shading system tailored to your individual requirements.

02 Placing an order with CARAVITA

Our technicians review the order placed with your specialist retailer and create a production order in our production system. We then confirm the delivery date with your specialist retailer to give them plenty of time to organise a date for installation at the specified location.

03 Ready, set, go

Now it's time for production to begin. All the necessary materials first undergo a careful quality check by our incoming goods team. This allows us to make sure that our aluminium components, fabrics and electrical components satisfy our strict quality criteria.

04 Precision and passion

A lot of experience and knowledge goes into cutting the aluminium parts and coating them with one of the 200 colours available. While this is happening, the sturdy acrylic fibre fabric is cut with precision down to the millimetre and sewed. This is followed by assembly, during which the parasol pole is fitted with its internal mechanism, including the gear box and integrated wiring for the parasols with electricity.

05 Final check by an expert

Our experienced quality managers check every nook and cranny of each parasol. Your parasol is only delivered to your specialist partner once every component has been perfectly finished, the parasol opens and closes effortlessly and silently, and both the frame and the canopy meet our exacting quality standards.
